TO RAYMOND.

Raymond, why now neglected hangs thy lyre, Once touched with sweet and wild poetic fire Or when soft sorrow o'er thy mind has hung, Thy harp with milder cadence then has rung-Those strains so soft, so tender, yet refined, Spoke the true index of a cultured mind; But when thy imagination soars away, Through the bright regions of athereal day, Then Fancy follows thee on anxious wing, To catch each object as to life they spring. Then, Raymond, why thy genius thus conceal? Be thine the task to teach us still to feel, And may the Muses wreathe what's justly thine, A lovely chaplet, and thy brows entwine. 3d, Mo. 1823.

TO MESSRS. QUIZ & CO. Most worthy Gentlemen-all hail! Thrice welcome to the critics chair; Now, " rhyme and reason" shall prevail,

"The roast," and " mayhap, something rare." We are right glad to see you creep From "dark oblivion's friendly sleep," And hope the town, and, are, the nation, Will proudly own the obligation;
"True worth may live"—a deep And very modest declaration.

We further hope you will be just, Nor take too much of wit on trust ; For fear-like modern bankers-you May fail to meet your bills when due; Nay no offence-you ever will No doubt your promises fulfil; Tis only hinted thus, for fear Your quizzing glass might not be clear; For instance-you " with great delight, Perused the piece addressed to " Night," And saw, what we cannot behold, That " Night the labourer would uphold ." Denving thence a pretty pun, By sacrificing truth for fun.

" Eager ambition's fiery chace I see, I see the circling hunt of busy men, Burst laws enclosure-leap the mound of right, Pursuing and pursued: each other's prey As wolves for rapine-as the fox for wiles, Till death the mighty hunter earth's them all.

This terrestrial ball is inhabited by myriads of human beings, all apparently industrious and eager in the pursuit of some object. Some stimulated by ambition, and a desire of fame-some by avarice and a thirst of wealth, and some by curiosity and a restless desire for novelty. These mainsprings of action that set the system of human affairs in motion. "Eager ambition," with its heralds to proclaim its stile and title before it, by sound of trumpet, desires to be elevated above the level of the gazing multitude-its votaries, urged by fame and the love of praise, contemn the most appalling dangers and perils, facing death itself to " seek the bubble reputation even at the cannon's mouth." Avarice, with a heart of steel and a vulture's eye, pursues its golden dreams, and often defend it as a whole, but it has certainly " re- to attain its purpose, " bursts law's inclosure-leaps the mounds of right," and even tramples humanity under feet for the sake of sordid pelf. Curiosity, whose food is novelty, ever restless and impatient, from the gratification of its appetite in toilsome researches after something new or strange -and in this "circling hunt" in pursuit of innovation, how often do mankind perplex and even distress themselves? How often do they sacrifice innocence and virtue at the shrine of folly? Governed by unhallowed propensities, and led astray by the impulse of passion, they often become "each other's prey," and break the bridle of the law, and even burst the bonds of civil union, to effect the purposes of interest and ambition. "As wolves for rapine" and cruelty, they delight in the fell work of mutual destruction, and even march to the field of blood and carnage without being stimulated by anger or revenge. ### INTERESTING STORY.

EXTRACTED FROM "THE PIONEERS."

Elizabeth and Louisa proceeded along the margin of the precipice, catching occasional glimpses of the placid Otsego, or pausing to listen to the rattling of wheels and the sounds of hammers that rose from the ralley, to mingle the signs of men with the scenes of nature, when Elizabeth suddenly started, and exclaimed-

"Listen! there are the cries of a child on this mountain! Is there a clearing near us? Or can some little one have strayed from its parents?" "Such things frequently happen," returned Louisa. "Let us follow the sounds; it may be a

wanderer, starving on the hill." Urged by this consideration, the females pursued the low, mournful sounds, that proceeded from the forest, with quick and impatient steps. More than once the ardent Elizabeth was on the point of announcing that she saw the sufferer, when Louisa caught her by the arm, and, pointing behind them, cried-

" Look at the dog !" Brave had been their companion, from the time the voice of his young mistress lured him from his kennel, to the present moment. His advanced age had long before deprived him of his activity; when his companions stopped to view the scenery, or to add to their bouquets, the mastiff would lay his huge frame on the ground, and await their movements, with his eyes closed, and a listlessness in his air that ill accorded with the character of a protector. But when aroused by this cry from Louisa, Miss Temple turned, she saw the dog with his eyes keenly set on some distant object, his head bent near the ground, and his hair actually rising on his body, either through fright or anger. It was most probably the latter, for he was growling in a low key, and occasionally showing his teeth in a manner that would have terrified his mistress,

" Brave !" she said, " be quiet, Brave ! what do you see, fellow?" At the sounds of her voice, the rage of the mastiff, instead of being at all diminished was very sensibly increased. He stalked in front of the

ladies, and seated himself at the feet of his mistress, growling louder than before, and occasionally giving vent to his ire by a short surly barking.
"What does he see?" said Elizabeth; "there

must be some animal in sight." Hearing no answer from her companion, Miss Temple turned her head, and beheld Louisa, standing with her face whitened to the color of death and her finger pointing upward, with a sort of flickseem to be the general objects that divide ering, convulsed motion. The quick eye of Elizabeth glanced in the direction indicated by her the attention of mankind, and are the chief friend, where she saw the fierce front and glaring eyes of a femble panther, fixed on them in

malignity and threatening instant destruction.
"Let us fly!" exclaimed Elizabeth grasping the arm of Louisa, whose form yielded like melting snow, and sunk lifeless to the earth.

There was not a single feeling in the tempera ment of Elizabeth Temple, that could prompt ber to desert a companion in such an extremity; and she fell on her knees, by the side of the inanimate Louisa, tearing from the person of her friend, with an instinctive readiness, such parts of her dress as might obstruct her respiration, and encouraging their only safeguard, the dog, at the same time, by the sounds of her voice.

"Courage, Brave" she cried, her own tones beginning to tremble, "courage, courage, good

A quarter-grown cub that had hitherto been un seen, now appeared, dropping from the branches of a sapling, that grew under the shade of the beech which held its dam. This ignorant but vi-cious creature approached near to the dog, imitating the actions and sound of its parent, but exhibiting a strange mixture of the playfulness of a kitten with the ferocity of its race. Standing on its hind the impulse of an inquisitive spirit, seeks legs, it would rend the bark of a tree with its fore paws, and play all the antics of a cat, for a moment, and then, by lashing itself with its tail, growling, scratching the earth, it would attempt the manifestations of anger that rendered its parent so ter-

All this time Drave stood firm and undaunted his short tail erect, his body drawing backward on its haunches, and his eyes following the movements of both dam and cub. At every gambol played by the latter, it approached nigher to the dog, the growling of the three becoming more horrid at each moment, until the younger beast, overleaping its intended bound, fell directly before he mastiff. There was a moment of fearful cries and struggles, but they ended almost as soon as commenced, by the cub appearing in the air, hurled from the jaws of Brave with a violence that sent it against a tree so forcibly, as to render it

Elizabeth witnessed the short struggle, and her blood was warming with the triumph of the dog, when she saw the form of the old panther in the air, springing twenty feet from the branch of the beech to the back of the mastiff. No words of ours can describe the fury of the conflict that followed. It was a confused scuffle on the leaves, accompanied by loud and terrible cries, barks and growls. Miss Temple continued on her knees, bending over the form of Louisa, her eyes fixed on the animals with an interest so horrid, and yet so intense that she almost forgot her own stake in the result. So rapid and vigorous were the bounds of the inhabitant of the forest, that its active frame seemed constantly in the air, while the dog nobly faced his foe, at each successive leap. When the panther lighted on the shoulders of the mastiff, which was its constant aim, old Brave, though torn with her talons and stained with his own blood, that already flowed from a dozen wounds, would shake off his furious foe like a feather, and rearing on his hind legs, rush to the fray again, with his jaws distended, and a dauntless eye. But age and his pampered life, greatly disqualified the noble mastiff for such a struggle. In every thing but courage, he was only the vestige of what he had once been. A higher bound than ever raised the wary and furious beast far beyond the reach of the dog, who was mak avails the devil and his angels! that some such power, in the present instance, suspended the threatened blow. The eyes of the monster and the kneeling maiden met, for an instant, next to scent her luckless cub. From the latter examination, it turned however, with its eyes apparently emitting flashes of fire, its tail lashing its side furiously, and its claws projecting for inches from its broad feet.

Miss Temple did not or could not move. Her hands were clasped in the attitude of prayer, but her eyes were still drawn to her terrible enemy; her cheeks were blanched to the whiteness of marble, and her lips were slightly separated with horror. The moment seemed now to have arrived for the fatal termination, and the beautiful figure of Elizabeth was bowing meekly to the stroke, when a rustling of leaves from behind seemed rather to mock the organs, than to meet her cars.

"Hist! hist!" said a low voice; "stoop lower, girl; your bonnet hides the creature's head." It was rather the yielding of nature, than a compliance with this unexpected order, that caused the head of our heroine to sink on her bosom; when she heard the report of the rifle, the whizzing of the bullet, and the enraged cries of the beast, who was rolling over on the earth, biting its own flesh, and tearing the twigs and branches within its reach. At the next instant the form of Leather Stocking,

the settlement was formed, and in fact the Pioneer] rushed by her, and he called aloud-" Come in, Hector, come in, you old fool; 'tis a

hard lived animal, and may jump again." Natty maintained his position in front of the maidens most fearlessly, notwithstanding the violent and threatening aspect of the wounded panther, which gave several indications of returning strength and ferocity, until his rifle was again load. ed, when he stepped up to the enraged animal, and placing the muzzle close to its head, every spark of life was extinguished by the discharge.

## The Ladies' Friend.

FOR THE SATURDAY EVENING POST. Remember thee! yes, dearest friend, Thy image will my steps attend, Where'er my wast'ering path shall be, In fancy still I'll picture thee. Remember thee! yes, that soft sigh, And tear that trembled in thine eye When last I bade farewell to thee, My bosom filled with sympathy. And oh! when grief assails my breast, When with tumultuous cares opprest No soothing voice is near to me, Then, then will I remember thee. When smiling pleasure shall impart Her thrilling transport to my heart, O, then will faithful memory Turn all my fondest thoughts on thee.

NEEDLES.

In last Saturday's Post we were favoured with a brief account of the manufacture of Pins, taken from the Artist's Manual, and from the same source I send a short sketch of the process of making Needles. An article, although trifling in appearance, is indispensably necessary and very useful in the hands of our fair Ladies-as Cowper

says, "The threaded steel flies swiftly-" -" The needle plies its busy task : The pattern grows, the well depicted flower. Wrought patiently into the snewy lawn, Unfolds its bosom; buds, leaves and sprigs, And curling tendrils, gracefully disposed,

From the workshops of England nearly the whole world is said to be supplied with this article of convenience, affording employment to thousands of hands engaged in the point of the compass he pleases. manufacturing process, which we are informed is commenced by drawing the steel nto wire of various sizes suited to the fineness of the needles intended to be formed. The steel thus reduced to fine wire is cut into pieces the proper length of the needles. These pieces are then flatted at one end-on an anvil in order to form the eye, which is punched with a well tempered steel punch. The needle is then pointed with a file, and laid on a long narrow iron to be heated red hot over a charcoal fire and when taken out is instantly thrown

Being assorted into the different sizes, from No. 1, the largest, up to No. 25, the smallest, they are put up into papers containing hundreds, half hundreds and quarters, and packed in tin cases, soldered close to prevent injury from moisture, and exported to every quarter of the globe.

> THE ROYAL FAMILY OF SPAIN. The Madrid correspondent of an English paper gives the following melancholy picture of Royalty.

"I happened to be walking yesterday near the

palace, when I observed a number of state carriages going towards the principal staircase. I was told that the King and the Royal Family were just preparing to take their usual promenade, and I had the curiosity to see how they appeared. The palace is a fine pile of buildings, after the plan of the Tuilleries at Paris, but upon a less extensive scale. It is not yet much more than half completed: the Royal Family occupy one side of the square, which is built in a light and very graceful style of architecture. In the middle there is a noble gateway, through which any body may pass during the day; it is, in fact, a common thoroughfare. As you pass through, you see on the right hand the principal staircase; on approaching which, I found it lined. with battle-axe guards; a party of carbineers, and four or five grenadiers occupied the lower steps, and stood on each side of the King's carriage, which was in waiting. The infantry guards were drawn up in the square before the palace, and a body of horse guards, to the number of five or six and twenty, were waiting also in the square to escort (i.e. to guard) the Royal carriages. In the passage there were two or three military men in undress, and seven or eight old women, who were waiting to present memorials to the King-though they can scarcely be ignorant that the time for asking favours from the King of Spain is past. After waiting some time, the King and Queen descended the staircase, attended by several officers of state, all in full dress; that is to say, in dark blue coats, turned up with crimson laced with gold, in the usual military fashion white small clothes and white silk stockings. Such was also the dress of the king, in addition to which he wore a blue ribband over his left shoulder, and a star on his breast. The Queen a slight genteel figure, appeared in a pink satin hat, and a blue silk mantle, edged with ermine, which covered the remainder of her dress. Her face has a mild beauty in it, which strongly interests a spectator. It looked on this occasion, pale and oppressed with inward suffering. The lace of the King is remarkable for the vacancy-and, in deed, I must say, the deformity of its expression The chin and lower lip protrudes considerably beyond the line of the upper features, and seems scarcely to belong to them. The upper tip is enveloped in mustachios; and yet with these features almost of the animal tribe, there is a mixture of t sanctions and commands .- And the heart intelligence, loftiness and feebleness in his eye, which indicates a peculiar character. Two of the ment its anguish by self-reproach. Love is the carriage door, offering their shoulders to the officers of state, placed themselves at each side of not only an innocent but a noble passion. assistance of her majesty while getting in. I observed she merely took the hand of the King and got in, not without some effort, without avaling herself of the assistance profered by the officers of state. She smiled not; she scarcely looked around her and addressed not a syllable to any body. The King, who is a good portly figure, the path of duty with flowers, and scents looked around like a man who wished to give an impression that he was a free agent but who betrayed his real state of duress by a certain aukwardness which he could not control. He was as reserved and silent as the Queen. There is only one step, which is firmly fixed outside, beneath and extracting from earthly disappoint- the door of the carriage, and this is so high that both their majesties were obliged to ascend it by means of a footstool. The footstool was then strapped behind, where it hung dangling as the carriage drove off. But before it left the palace, his Majesty put out his hand from the window, and received the several petitions, which were presented to him. I was rather surprised that this custom is permitted to remain, as it may easily be made the vehicle of private communications to the King, which the whole system of the household is at present framed to intercept. Don Carlos, the King's eldest brother-and very like him with the exception that his figure is short-his wife and family followed in the second coach, equally reserved. Don Francisco and his consort followed in the third. He has a good, but a short figure -In getting in, he gave one or two of the officers a nod of recognition, and forced a smile into his countenance, which seemed to be very little valued by those for whom it was meant. The three carriages rolled away without a cheer, or an expression of any sort from the persons present. They were immediately joined by three other state carriages, filled with the officers of the household, and the whole cavalcade was attended by the escort already no-

The infantry received the King in a respectful manner the band playing, and the standard lower. ed as he passed. Thus the King and the royal family take their rides every afternoon, the weather permitting—thus attended—thus guarded. If they have amongst them a spark of sentiment, they must envy the humblest cuttager whom they meet on their road, for he is free to breathe the mountain air, and to turn the head of his mule to whatever

CHURCH GOVERNMENT. William Penn, speaking in the name and or behalf of the Society of which he was an ornament, says, " The power we claim and use differs both in its nature and object, from the power used by the Roman and other churches. In nature, for ours is not coercive and penal: In object they differ, because their authority regards matters of Faith and Worship; but that we use only order and the government of Society And here I must beseech toose into whose hands this may come, to stop awhile and ponder with the spirit of meekness and wisdom, this distinction-We never assumed to ourselves a Faith or Worship making power, nor did any one ever charge it upon us; our case is plain order, not articles of Faith-and the discipline of Government, not of Worship."-The above are the fundamental principles upor which the order and government of the Society of the people called Quakers was originally estab-" Not articles of Faith, nor matters of Worship." When ecclesiastics of any profession, acting as a collective body, assume to themselves the power of judging their Christian brethren on matters of faith and worship, the history of almost every church shews, that there is scarcely any infustice within their power which they hesitate to commit; though, perhaps, as individuals of irreproachable character. The fact is, that when so associated, they place themselves, however unconscious of it, under the bapeful dominion of Priestcruft, which is so infectious, that as a celeb ated writer once said of it, " One drop is enough to contaminate the Ocean." Why then should ye judge your brother? What rule of the Society do you charge him with having broken? Would ye have us countenance your injudicious accusation, and thereby proclaim that the rights of conscience, for which our ancestors suffered so much, are no longer respected or even tolerated amongst us }-Would ve have us unwisely commit the reputation of the Society, as being accountable for the

# Curopean Intelligence.

From Europe .- By the packet Ships Dido and Alexander, arrived at this port, Liverpool papers to the 8th of January, seven days later than those brought by the last arrivals at New-York, have been received. They contain no intelligence of moment.

The question of peace and war remained undecided. The Duke de Montmorenci had resigned his situation in the French Cabinet, and Mr. Chateaubriand occupied his place. From this change it was inferred that peace with Spain would not for some time at least be interrupted; and the opinion received confirmation from a note which the French Government had addressed to the court of Madrid. The French funds remained almost without fluctuation.

The Nuremburgh papers assert that the continuance of Peace between Russia and Turkey, is impossible. Some of the ministerial papers of London, now contend that it will be proper for England to interfere in the affairs of the Greeks.

Five persons have been arrested at Orleans, accused of conspiracy against the French Government.

Recent advices placed it beyond doubt that the castle of Corinth, and the Fortress of Retino, had surrendered to the Greeks. The Lisbon Cortes, on the 14th of Dec.

Don Juan Jabit, the new Minister from Madrid, and the Spanish Mission, together with the Duke of Wellington, Lord Fitzroy Somerset, and a distinguished party, dined with Mr. Canning at Gloucester Lodge.

A few days since, Lord Holland and the Duke of Bedford visited Westminster Abbey, for the purpose of viewing the monument to the memory of the late Mr. Fox, which has lately been placed at the outside of the choir, nearly opposite to the great north entrance. After inspecting the monument for some time, these Noblemen gave orders for the removal of the cap of liberty which had been placed near the bust of the deceased. The cap has accordingly been removed .- Observer. We received the Paris papers of Wednesday

LONDON, Dec. 25. A Smuggler and on Exciseman.-A ludicrous ircumstance took place last week in the neighorbood of Lyme. A smuggler was carrying a pair of tubs at his back, and turning a corner came in full view of the receiver of seized liquors. After a moment's hesitation, his ready wit suggested the following ingenious method of escape .-Although he knew the receiver, the receiver knew nothing of him. He made up to the receiver with is kegs, and laving them down before him, said ie was uncommonly glad to have met him, as he had undertaken the hardest job he had ever atempted in his life. 'Sir, Weaster, the exciseman axed me to take these tubs to you, and gied me 2s. for the job, but d-n him, if I had know'd hey'd been so heavy, and would ha' cut my shoulder so there the fellow writhed most pite ously,) I'd seed un to the devil afore I'd ha' touchd o'em.' 'Well, but my good man,' said the receiver, 'what can I do with them? I want to proceed on my journey. I hope you will carry them to my house, which is a quarter of a mile farther,' 'I'd be glad to oblige ye, Measter, but my shoulder be so cut that I can do no such thing. Come, come, my good fellow,' said the receiver. try what you can do, and here's 2s, more, and when you have brought 'em my wife will give you cup of drink into the bargain.' 'Well,' quoth he man, 'I'll try what I can do;' and putting the silver into his pocket, and the liquor upon his back, the receiver rode off, and the smuggler proreeded on his way, which we may naturally supoose was in any direction rather than that of the eceiver's house .- Exeter Guzette.

Female Courage. On the morning of Thursday last, about three o'clock, the maid servant of the Rev. Mr. Beckwith, curate, of Essex, England, was alarmed by a noise at the window of an apartment below, and looking out she saw the body of a man about half way through the sush and lie was then pushing himself in the remainder of the way. Mr. Beckwith was at that time in London, on visit, and the only man in the house was the parish clerk who slept there. The servant went imm diately to call him, and having informed him of what she had seen, desired that he would get up and protect her and her mistress. She then went to Mrs. Beckwith's apartment, and had no sooner communicated the terrifying intelligence to her, than this couragous young lady took a loaded pistol in one hand and a candle in the other, and desiring the servant to follow her, went down sta

There are four cantos of Don Juan now in the press. The noble author has again measured his own length in the further process of this interminable poem. These cantos are full of whim and variety, and contain more admirable specimens of good taste, after the author's finest manner. They are to appear in January.

A subsequent account says that Lord Byron has not continued "Don Juan," and that he regrets having taken part in the "Liberal."

FROM GIBRALTAR .- As arrival at Boston from Gibraltar, has brought papers from that place to the 1st of January, but their contents are quite devoid of interest. Some confused details are given of the civil war in Spain, but the dates are no later from Madrid than have been received before. No movements are mentioned of a very formidable character. A Gibriltar paragraph of Dec. 31, states that a column of about 350 government troops was lately entired into the town of Traiguera, (Valentia) by the Alcade's assurance that a few rebels who had been there, had since withdrawn, although several bands were at the time concealed in the houses. The consequence was a surprise and an action, in which both parties suffered severely.

Intelligence having been received by Commandant/Manso, that the factions, to the number of between 4 and 5000, intended to attack his troops in Cornudella, he determined to be beforehand with them; and accordingly charged a body of 3000 of them on the heights of Toroixa and succeeded in driving them from their position, killing and wounding some of their men.

The Rear Admiral of the Dutch squadron in the harbour of Port Mahon, has communicated to the Military Governor of that island, the important information, that through the Consul of his nation at Algiers, the Dey had been called upon to state whether he had declared war against Spain, and whether it was intended to commit hostilities upon the Spanish flag; to which the Minister of Marine replied, that a rupture with Spain had certainly taken place when the Consul went on board, (18th Sept. last); and that, if the Der's corsairs should go to sea, they would capture whatever Spanish vessels they should chance to fall in with, just as he supposed the Spanish slips would do with the Algerines. The yellow fever had subsided at Algiers. Several ships of war were fitting out at Al giers, in the early part of December.

The immense taxes she pays are principally levied on foreign nations. true that the peop fand pay them in the first instance, but it is equally true, that they are repaid with interest, by foreigners who consume their manufacturers. If we have one million of living manufacturers who con sume the necessaries of life, we have an hundred millions of manufacturers of brick and stone that contribute immensely without consuming any thing Our prosperity is so great as to enable the wheels of government to run smoothly, and nobody enquires whether they run on the oil of corruption. Give us plenty to eat and to drink and to wear and we care but little about the nature of our govern. ment or who governs."

Extract of a letter from Liverpool, dated Dec. 31 " This day closes the year, and the imports of cotton are 40,000 bales more than the imports of last year, but the stock on hand is 12,000 bales less than the stock at the close of the year 1821; of course, this year the consumption is 52,000 bales more than the consumption of 1821. This will give you some idea of the prosperous state of manufactures in this country.

The arrivals at Port Sandusky, on Lake Erie. during the past year, were 178. A few years since the entrances and clearances would have comprised little else than stray logs, Indian canoes, or perhaps a few wandering barks, manned by squirrels if the stories of travellers be true of the mode o navigation pursued by these quadruped emigrants -Thus we progress in this new hemisphere. The life of man here includes what is elsewhere the life of a nation. He sees the birth, infancy, youth, and maturity of society; and it surely should not be a matter of surprise that, when we are pushing ward so rapidly, our eyes should be to the direction which we pursue, and that we should look before rather than behind us, as our European censors are used to do.

# Total Affairs.

A duel was fought early on Wednesday morning last, near Camden, opposite this city, between a Lieut. of Marines and a young man whose connexions are of the first respectability. The former was severely wounded at the first fire, but it is said he will recover. We have had no information which might be depended on, relative to the causes that led to this illtated meeting.

On Sunday evening last, between the hours of 7 and 10, while the family were absent, an attempt was made to set fire to the kitchen of the house occupied by Mr. Bennet, in Tenth near Locust-street, by means of the back window being forced open, and combustibles placed between the shutter and sash, which fortunately went out without doing any other damage than burning the window frame and shutter.

Last week, a negro secreted himself in the store of Messrs. Tunis & Way. So soon as the store was locked up the stranger proceeded to gather together such articles as he deemed most valuable. In this Galliard had been apprehended, while in up his booty was about to retire, but here the act of washing the bloody clothes they a difficulty presented itself. The store was so well secured, that the black man could not get out without the assistance of an iron bar, which made so much noise as to alarm the watch, who very unceremoniously conducted the him to prison.

Fifty of the pews in St. Stephen's Church, located in south 8th street, near Market, were disposed of by auction yesterday week, for a sum exceeding 16,000 dollars. Other pews were disposed of by private sale on Saturday, increasing the aggregate to more than 19,000 dollars. The whole cost of the Church is computed at 35,000 dollars.

On Sunday afternoon last, a fire was discovered in the upper part of a new brick house at the corner of Eleventh and Callowhill streets. The indefatigable exertions of the members of the different fire companies saved the building, and prevented the demolition of a whole range of dwellings which form the square, and are owned by Jacob Ridgway, Esq.

An attempt was made on Wednesday night last, to purloin letters from the Post Office in this City, by means of a machine introduced into the opening of the window through which the letters are deposited. CARBONARI IN CUBA.

A letter before us, says the Washington Gazette, states the existence of an extensive association throughout Cuba, that are initiated into a sort of secrecy, like the Carbonari of Naples, to further the cause of liberty-and that secret meetings are frequently held in Havana for this express object. No government can be more feeble than the present, where piracy and murder has become so familiar that we cease to wonder at their recital.

Spanish Judges .- A case is published of a cap ture of an American by a Spanish vessel, and Spanish Judge legalizing the act. The J integrity of a Spanish Judge is something like bravery of Don Quixotte, as the following li within our knowledge, will attest. An American was imprisoned at Madrid on some trifing od sion, and a fellow cuizen went unceremonio the Judge, and offered him a bribe of two and (\$22) to release him. The Judge flew into ible rage-talked of his honour and dignay, finally threatened to commit the American wil companion, for during to bribe him. The Ame can alarmed, begged pardon most pen and apologised, on the ground that he mista for a custom. The Judge, on the explanation, doned him. The Broker, transacting the bush of the American, met him on the Pardo next a " How come you," said he, " to be so indiscret to attempt to bribe one of our Judges! Ik! me this morning of it, and laughed at you city. Now, (said the Broker,) I bribe him ly, but it wont answer for you to make the expense ment. Give me the two ounces; one I will kell the other I will give the indige, and you shall have

A law suit recently brought by Jacob Ridgway of this city, against the Farmers' Bank of Bucks County, having caused considerable discussion, the following brief sketch may be interesting to some of our readers :- It was instituted for the purpose of recovering Six Thousand Dollars, on a Check drawn by Joseph Hulme, late President of that Institution, in favour of E. I. Hollinshead, who endorsed it, and in the course of business, negociated it with Jacob Ridgway, the plaint f. The Check is in the following words:

Philadelphia, June 22d, 1821. Sixty days after date, Cashier of the Farmer's Bank of Bucks County, pay to E. I. Hollinshead, or order, Six Thousand Dollars. Joseph Hulme, President."

The contested point on which the question rested was the meaning of a resolution passed by the Board of Directors on the 6th July, 1821, as follows:

Resolved, That it is the duty of the Board of Diectors to support the credit of the paper of this Institution; and that funds, during the present stagnation of trade, most be raised: We, therefore, authorise the President and Cashier, as often as THEY find occasion, to borrow money, or obtain discounts, in order to raise fund for the purpose afore-

The counsel for the plaintiff contended that this resolution of the board of directors, was the authority on which Mr. Hulme acted; that the institution was bound to honour the draft or check of their president; ton:and that the word they, gave the President and Cashier a right to act on the resolution individually, as well as conjointly. In opposition, it was argued that the Bye-laws of the institution gave no authority for such an act; that the act of Mr. Hulme was not the act of Mr. Hulme and Harrison, who were jointly authorised. That the money was not obtained under the authority of. and never benefitted the institution, and that it therefore was not bound to redeem the check.

After a patient hearing, the Jury gave their verdict in favour of the Bank.

This cause was tried at Doylestown, and "And he it further enacted, That the Sheriff occupied the court one week. Messrs. McIlvaine and Chapman, counsel for the Plaintiff-and Pawling and Kittera on the your cost. A Butcher's word for is. part of the Bank.

> Nomination .- The Caucus which met at Har. risburg, on the 4th instant, has separated, after nominating John ANDREW SHULTZE, a Candidate for the Office of Governor, at the election in October next. It is hoped the PEOPLE will enquire and ascertain the character and qualifications of the person, before they give him their suffrages, as it is essential for the best interests of the state that the Governor elect should be a firm and independent man, untrammelled by party prejudices, and free from the toils of designing demagogues. We boast ourselves of no political creed, excepting that which binds the union of the States; therefore, as citizens, we protest against this usurpation of power by some members of the Legislature, who violate the sacred trust reposed in them by their constituents, in thus endeavouring to forestall the freedom of election.

The second session of the 17th Congress of the United States terminated its sittings on Monday the 3d inst. The most important act which has passed this august body, during their procrastinated deliberations, is that relating to the suppression of piracy. Should this great object be effected, of which there can be little doubt, since lices of confederation" on which the constituhave been put in requisition, and are now destined for the same laudable enterprise, it will be a consummation devoutly to be wished," and may satisfy the liberal minded, for the time and money lost to the nation by a long session of the national assembly, in which little else has been done to promote the interest of the people. Certainly it will be a cheerful duty for our brave tars to revenge themselves of the pirates-to root those lawless freebooters out of their dens, and chastise them for their cruelty and repeated acts of violence committed on the high seas .- The names of the vessels composing the squadron under the command of Commodore Porter, afford a curious collection of "flesh, fish and fowl." A Providence paper expresses the hope, that the Sea gull will discover the Pirates afar off, the Ferret and Weazle drive them out of their retreats; the Decoy cheat them with a hope of plunder; the Greyhound, Terrier and Beagle, pursue them into the toils of the Fox; the Musquito, Sand Fly, Midge, Gnat and Gollinipper, sting them to desperation, and the Jackall and Wild Cat tear them to pieces!

The Philadelphia Bank bill, now before the Legislature of this state, has been so amended in the house, as to substitute in lieu of the original bonns, the swa of \$100,000 dollars, which shall be subscribed to the Chesapeake and Delaware ached this city, that we have heard of. arising from this stock, for fifteen years, at the he is enacted, &c. ### A GUIDE To the Bame of Draughts.

It has been suggested to us that the publication of Payne's Guide to the GAME OF DRAUGHTS. would meet with the approbation of many persons, who incline to amuse themselves with this pleasing but difficult play. By the politeness of a friend, we have been favoured with the loan of a copy of the above work, which we believe has never been printed in this country-and as it will not occupy much of our room, and may be most satisfactory to those who would study the rules of playing scientifically as they are laid down by the author, we shall commence in our next number with such portions of them as are in order, affording a correct knowledge of the bearing of each different move on the board, and continue them weekly until completed. In order to do away any impression on the mind of the fastidious Critic, who disrelishes, without distinction, every description of play, and doubts the propriety of treating upon them, and who may, therefore, be opposed to our giving publicity to the one in question, we make the following extract from the preface of this book, which is expressive of our own sentiments in regard to the Game of Draughts: To ascertain distinctly consequences in their

causes-to calculate with promptitude the result of intricate variety-to elade by vigilant caution the snares of stratagem; are lessons, which the Game of Draughts strongly inculcate, and uniformly explain. While, thus, the Game on one hand, affords the means of intellectual improvement; on the other, it banishes every temptation to moral depravity. It guards simplicity from the lures of deceit, and prevents cunning from preying on credulity: for where superior skill alone commands success, the ignorant are not mad enough, to hazard their fortune or their happiness, in a contest, where loss is certain, and gain impossible. Considering the Game as an amusement, it cannot be denied that it tends to improve those faculties of the mind, which are eminently useful in every condition of life; and may therefore be made the School of Wisdom, but cannot, like the Gaming Table of chance, become the nursery of vice.

According to the calculation of M. Olbers, of Bremen, after a lapse of 83,000 years a Comet will approach to the Earth in the same proximity as the Moon; after 4,000,000 years, it will approach to the distance of 7700 geographical miles; and then, if its attraction equals that of the earth, the waters of the ocean will be elevated 13,000 feet, and cause a second deluge. After 200,000,000 years it will clash with the earth! [dreadful foreboding for those who live to see it.]

Distress in the West.

MUCH distress exists in this City-originating solely from the teeth; owing, in a great degree, to the manner in which the business of the Dentist has been conducted. If information had been publicly given, many of the most distressing cases might have been prevented-timely application would have been made-the teeth would have been properly treated, and many persons who now are almost destitute of teeth, would still enjoy them. But it has been so unfashionable to advertise, that no dentist of any celebrity would risk his popularity by giving publicity to information so much required. But these injurious prejudices have been partially dissipated, and Williams now has the satisfaction of seeing advertisements and public information much more respected, and, he hopes, in a few years, the complaints and lamentations which are now heard so frequently, will
